BRAND GUIDELINES 2025/2026

OPPTY BRAND IDENTITY

Cutting Through The Noise

The payments industry is a maze of disconnected systems and overwhelming options. Businesses face constant challenges trying to keep up with evolving customer demands while managing fragmented payment platforms. This endless complexity not only slows growth but also creates unnecessary barriers to success, leaving many searching for a way to unify their payment solutions and focus on what truly matters.

Enter Optty—a guiding force designed to simplify the complex. By offering a single, seamless integration, Optty empowers businesses to unlock limitless payment possibilities with unrivaled simplicity. No longer bound by the noise, businesses can focus on growth and delivering exceptional customer experiences.

This mission is embedded in Optty’s visual identity. The grainy, abstract texture serves as a metaphor for the chaotic and fragmented state of the payments landscape. Over this textured backdrop, Optty’s clean, high-contrast visuals stand out boldly, representing clarity, focus, and simplicity.

Optty’s design motif is more than aesthetics—it’s a visual declaration of its promise to cut through the noise, transform complexity into clarity, and pave the way for businesses to thrive in a world of limitless possibilities.

01

Logos & Usage

Primary Logo

The Primary Logo is the brand's front-facing mark and the preferred version for most applications. The logo maintains a balanced composition that is simple, and ensures strong brand recognition.

optty™

Logo Icon (Overview)

The Logo Icon represents a modern, sophisticated, and future-forward identity, symbolizing trust and innovation in payments. The mark features a globe within an "O," reflecting Optty's global reach, while the negative space forms a mosaic of nine pieces, representing its nine payment architectures. At the center, a star emerges—Optty's north star—guiding the way by simplifying complexity and serving as the single point of integration for global payment solutions.

STAR

Logo Icon

The Optty logo icon is primarily used for graphic treatments, favicon, and select brand applications. While it is not currently featured as a standalone front-facing element alongside the full logo, it serves as a recognizable brand asset in digital and visual contexts.

Modular Logo

It's crucial to utilize the correct version of the logo according to available space to ensure adequate visibility. This page serves as a guide for determining when to employ specific variations of the Miocene Chocolate logo. If uncertainty arises regarding the appropriate logo version to use, please reference this page.

PRIMARY LOGO

Largest scale version of the logo. Should always be prioritized when adequate spacing is available.

PRIMARY LOGO (NO TM)

Used only for smaller scale placements for more optimal spacing, where the TM may have compromised visibility, e.g. social media icon

ICON LOGO

For extra small use, such as Favicon

Social Media Icon

The Social Media Icon for Optty should always utilize the Primary Logo on the Pulse color background. Do not use any other logo variations or colors for this representation of the brand.

Tagline Logo

The Tagline Logo is reserved for applications where brand messaging needs to be exceptionally clear and reinforced, or where the tagline enhances brand recognition or provides necessary context—such as in campaign materials, high-impact advertisements, or environments where Optty is introduced to new audiences. This variation should not replace the primary logo in standard brand applications but rather serve as a strategic tool to emphasize the brand's positioning when clarity and emphasis are paramount.

Unrivalled simplicity.**

Product Logos

Optty product logos feature the Optty logotype with the product name beneath it, ensuring consistency across the brand’s offerings. They should only be used in placements directly related to their respective products, such as product pages, documentation, and marketing materials, and should never be used as standalone brand marks.

ON LIGHT BACKGROUND

ON DARK BACKGROUND

Minimum Clear Space

Minimum clear space MUST be equivalent to .5X the height of the logo. No other graphic elements can be within these boundaries, in order to make sure the logo stands out as much as possible.

Logo Misuse

In order to preserve the integrity of the Optty brand, it’s imperative to use the logo in the appropriate formats, as outlined within this document. DO NOT under any circumstances alter the logo. Several examples of misuse are outlined below.

MISUSE EXAMPLES

Do NOT use multiple colors for the logo

Do NOT use colors that aren’t a part of the color system outlined within this document

Do NOT outline the logo. The logo should ALWAYS utilize the appropriate fill colors

Do NOT adjust kerning between logotype characters

Do NOT compress or stretch the logo

Do NOT rotate the logotype

Do NOT apply effects to the logo

Do NOT use different fonts for the logo
